

MOTH NIGHT at Deer Park Prairie!

Join the Houston Chapter - Native Prairies Association of Texas (HNPAT)

For Our Annual Moth Night

**Saturday, July 20, 2019
at Deer Park Prairie**

1222 E. Purdue Lane, Deer Park 77536

(Please do not park directly in front of our neighbors' houses)

Register at tinyurl.com/DPP190720

8:30 p.m. Doors open - visitors are encouraged to walk and view the prairie in the relative coolness and breeze around sunset

~ 9:00 p.m. or after dark: Moth and night insect viewing begins

Visitors are welcome to drop by and leave at any time. Cost: Free

Moth and insect enthusiasts **Katy Emde** and **John Schneider** will set up black (UV) lights and white screen to attract moths and other night insects. We had some Harris County firsts last year and a lot of fun! Once it gets dark, we'll see what shows up! We'll be ID'ing, photographing and talking moths and other night insects such as the [silver butt beetle](#). Light refreshments will be served in the house - please [register](#), so we can get an estimate for food.

- We encourage you to post your photos on iNaturalist and add them to the Deer Park Prairie Project (<https://www.inaturalist.org/projects/deer-park-prairie>).
- Want to know more about moths? Go to <http://nationalmothweek.org/>
- Note: For anyone planning to walk on the prairie, closed-toe shoes and long pants are required. Insect repellent spray is highly recommended.
